Keewatin and Sky Harvest Submit Data to Saskatchewan Wind Power Integration and Development Unit

Keewatin Windpower Corp. and Sky Harvest Windpower Corp. are pleased to participate in the Saskatchewan Wind Power Integration and Development study. At the invitation of Saskpower the companies have provided their data to Genivar, a Calgary based engineering firm, who will conduct the study on behalf of the utilities.

Chris Craddock, C.E.O. and President of Keewatin, says “By cooperating with Saskpower and submitting our data we are assisting them in their efforts to define a productive plan for wind power in Saskatchewan. We will continue to engineer our projects so as to be ready for any request from Saskpower for a proposal.”

Sky Harvest is entering into engineering studies with Genivar that will define project costs with current market conditions. Turbine prices, road construction costs, electrical collection and transmission costs are among the priorities. Work is scheduled for mid October to cooperate with local land owner’s harvest requirements.

Keewatin is proceeding with the acquisition of Sky Harvest pending the completion of an audit and fairness opinion of the transaction.

Safe harbor for Forward-Looking Statements:

Except for statements of historical fact, the information presented herein constitutes forward-looking statements. Forward looking statements in this press release include that we are engineering our projects so as to be ready for any request from Saskpower for a proposal; that work is scheduled for mid October; and that we are proceeding with the acquisition of Sky Harvest. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the company to be materially different from those indicated. Such factors include general economic and business conditions, our ability to acquire and develop specific projects, our ability to fund operations, that we may not get a request from Saskpower, if we do we may not be ready to present a proposal and if we do present a proposal it may not be accepted; we may not get necessary labor or equipment to commence work in October or at all; and we may not be able to proceed with the acquisition of Sky Harvest because of regulatory issues or other factors over which we have little or no control. Readers should refer to further risk factors set out in our periodic reports filed on Edgar.
